

AFRL D'Azzo Research Library

Library Website

<https://2433afrlwr.stacksdiscovery.com/>

Physical Location

2950 Hobson Way, Bldg. 642
Wright-Patterson AFB, OH 45433-7765

Virtual Reference Desk

afrl.wsc.library@us.af.mil

Library Hours

Monday - Friday 0800 - 1700

The library is closed weekends and federal holidays.

LIBRARY RESOURCES

FEATURED DATABASES

Aerospace Research Central (AIAA)
BIOSIS via Web of Science
Defense Technical Information Center (DTIC)
EBSCOHOST Databases
Engineering Village
IEEE Xplore Digital Library
PubMed
Scopus
SPIE Digital Library
ProQuest
Web of Science

POPULAR RESOURCES

ACS publications
AIP (Scitation)
APA
Browzine
Harvard Business Review
IOP Science
Nature Journals Online
Optica Publishing Group

Materials Research Database
NTIS via Engineering Village
SAE Mobilus
SciFinder
EP/USPTO/WIPO Patents via Engineering Village

LIBRARY SERVICES

We offer In-depth literature searches conducted using several commercial and DoD clearance sensitive databases for SBIRs, Topic Searches, New Starts, Animal Protocols, and BAAs.

We conduct patent searches and reviews with commercial and subscribed databases, including Derwent, SciFinder, and Engineering Village.

We can answer a wide range of questions that range from specific topics or technical research data to historical references and queries.

We manage and archive all WPAFB authored technical reports including scheduling SME's and declassifying, digitization of older reports, and access to higher classified documents and reports.

We instruct AFRL Researchers one on one or schedule groups on how to use our research tools to empower them to excel at supporting the AFRL mission.

We can find and deliver Standards, Specifications, Codes, and Regulations from government, military, and commercial sources.

We offer market research and landscape analyses employing Elsevier's SciVal tool to generate reports and analytics on research queries, authors, countries, institutions, and organizations.

MISSION STATEMENT

The AFRL D'Azzo Research Library provides access to scientific and technical resources that empowers the Wright-Patterson (WP) scientific and engineering community to excel and to lead in the development of cutting-edge technologies for America's warfighter.
